

Two held-out supervoxel graph forecasts from the retained model

Graph panels show the supervoxel rollout in patient-centered millimeter coordinates; histograms show T0-to-T3 MC FTV draws.

ISPY2-209397
held-out case

ISPY2-149654
held-out case

Legend: nodes: low high supervoxel FTV contribution; larger node = larger local volume; gray edges = kNN graph;

bars = MC draws; shaded band = raw 90%;

blue = deterministic prediction;

green = observed FTV.
